

TROPICAL CYCLONE BULLETIN NO. 14

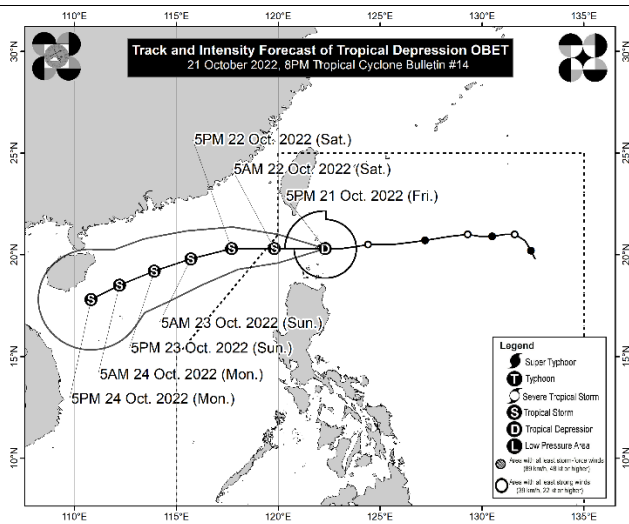

Tropical Depression OBET

Issued at 8:00 PM, 21 October 2022

Valid for broadcast until the next bulletin at 11:00 PM today

“OBET” CONTINUES TO MAINTAIN ITS STRENGTH AS IT ABOUT TO PASS VERY CLOSE OR OVER BATANES

Location of Center (7:00 PM)
The center of Tropical Depression OBET was estimated based on all available data over the coastal waters of Basco, Batanes (20.3°N, 122.0°E)
Intensity
Maximum sustained winds of 55 km/h near the center, gustiness of up to 70 km/h , and central pressure of 1004 hPa
Present Movement
Westward at 25 km/h
Extent of Tropical Cyclone Winds
Strong winds extend outwards up to 220 km from the center

TROPICAL CYCLONE BULLETIN NO. 14

Tropical Depression OBET

Issued at 8:00 PM, 21 October 2022

Valid for broadcast until the next bulletin at 11:00 PM today

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

- *Tonight until tomorrow early morning:* Light to moderate with at times heavy rains possible over Batanes and Babuyan Islands
- Under these conditions, **flooding and rain-induced landslides are likely**, especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps and in localities with significant antecedent rainfall.

Severe Winds

Throughout the passage of OBET, **strong winds** (strong breeze to near gale strength) may be experienced within any of the areas where Wind Signal No. 1 is hoisted.

HAZARDS AFFECTING COASTAL WATERS

- Under the influence of the surge of the Northeast Monsoon, a **marine gale warning** remains in effect over the seaboards of Northern Luzon. For more information, refer to Gale Warning #25 issued at 5:00 PM today.
- In the next 24 hours, the combined effects of the surge of the Northeast Monsoon and the tropical cyclone may also bring **moderate to rough seas** (1.5 to 3.0 m) over the seaboards of Central Luzon and the eastern seaboard of Southern Luzon. These conditions may be risky for those using small seacrafts. Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

TRACK AND INTENSITY OUTLOOK

- Tropical Depression OBET is forecast to track generally westward until tomorrow and its center is likely to pass over or very close to Batanes tonight. On the track forecast, OBET will exit the Philippine Area of Responsibility tomorrow morning.
- OBET is forecast to gradually intensify and may reach tropical storm category tomorrow morning. Further intensification is likely once the tropical cyclone moves over the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
